SUMMARY

I build turnkey web systems that automate how companies work — CRMs, internal tools, integrations, AI features and Telegram bots — from discovery and design to production and support. I also set up AI agent workflows for dev teams, build desktop tools and make motion videos for products. In IT and design since 2008, full-stack web since late 2014, 6+ years leading frontend teams. With AI in the loop, the stack is a means, not a limit: I pick what ships the outcome fastest.

EXPERIENCE

MGear

Sept 2025 → present

Full-stack developer · frontend focus

A revenue intelligence platform for US hospital systems. Web app and admin UI end to end, a role-based analytics redesign, UI/UX design, the marketing site, a desktop app for the dev stack, AI-written user guides, motion videos and decks; NestJS and Go backend support.

React · TypeScript · Redux Toolkit · Ant Design · NestJS · Go · Electron · PostgreSQL · Remotion

2KWeby

2025 → present

Web developer · part-time, project-based · Czech clients

Websites, portals and redesigns for a Czech audience: culture and sports portals rebuilt from WordPress to Next.js, the studio's own site.

Next.js · Prisma · PostgreSQL · next-intl · Vercel

BOOSTA

Feb 2026 – Jun 2026

Full-stack developer (freelancer)

Built the HanimaX web app from the first commit — catalog, series and episode pages, paywall and subscriptions, i18n — and helped the backend developer on the NestJS API.

Next.js · TypeScript · HeroUI · Tailwind CSS · next-intl · NestJS · TypeORM · Redis

Raise.Band

Jan 2019 – Jan 2024

Frontend developer, Head of department · Kyiv

Led a team of 4 frontend developers building SPA web apps — CRM platforms and internal tooling — from architecture and UI/UX to deployment.

- Built a CRM for automating website promotion and a Chrome extension for the SEO team
- Head of the design department (2020–2021, part-time): mentored 3 designers, led the UI kit
- Introduced CI/CD, code review, conventions and architecture/API documentation

TypeScript · React · Redux Toolkit · Next.js · Strapi · Chrome extensions

Learnify.co

Aug 2016 – Jan 2019

Frontend developer & web designer · Rivne

80+ turnkey websites — design, layout, CMS integration, SEO and support. Automated the frontend workflow (Gulp, bash, CI/CD), wrote conventions, mentored newcomers.

RTE Ukraine

Jun 2010 – Mar 2014

Software & web developer, IT administrator

Software that automated the company's business processes, plus corporate websites and infrastructure. That's where my love for automation started.

Delphi · WordPress · Linux

Web design

Aug 2008 – 2011

Freelance web designer (UI/UX, Flash)

Interfaces and website layouts in Photoshop for turnkey sites. That's where my eye for UI/UX comes from.

SELECTED WORK

Ledgerline — revenue intelligence for healthcare · US healthcare SaaS · hospital systems

One workspace for hospital case managers and medical directors: payor authorizations, peer-to-peer reviews, clinical oversight and a unified patient census.

SCG — AI content automation · Raise.Band · content team

End-to-end AI content automation for every Raise.Band site: from a keyword to a published, SEO-ready page. The whole content team works in it every day.

Harness — Claude Code that ships tasks unattended · Own product · AI workflow for dev teams

A kanban board where a two-line draft becomes a pull request: Claude Code agents write the spec, ask questions, plan, prototype, build, test in a real browser and judge the result.

- Product and business thinking
- Self-organized remote work
- Fast learner with an AI-first approach
- Attention to detail (design background)
